## OBJECTIVE

To pursue a career in production that focuses on digital media and storytelling. This includes producing, storyboarding, casting, implementing strategic communication, as well as filming and editing my own digital content. My years working and auditioning as an actor have prepared me with skills for working in this environment - the ability to collaborate with others on a team, understanding and respecting the production process, and conveying powerful stories that connect with people on an emotional level. I believe that film and video are the future of our society's communication, and I strive to be a part of its evolution.
